PIVOT + bind on-demand health insurance

Pivot is transforming how people quit smoking.

A personalized program that uses a smartphone app, digital sensor, and personal coaching to help you build the skills and motivation you need to quit smoking—and to track your progress along the way.

Progress Tracking

Quitting smoking can seem like it's all or nothing—either you've quit or you haven't. But the truth is that quitting smoking is a process, just like reaching any goal or acquiring any new skill. With the Pivot Breath Sensor and Pivot app, you have a fun, engaging way to track that progress. Pivot helps you see all the little wins on the way to your big quit victory.

Designed for all smokers

Typical quit programs ask you to set a quit date right when you start. Not ready to do that? You're not alone. About $\frac{2}{3}$ of smokers aren't ready for that. In Pivot, you don't have to set a quit date until you're ready. Because once you have the motivation to quit for good, all the rest falls into place. Pivot is designed to help you build that motivation.

Personalization

Smoking isn't the same for everyone. Neither is quitting. That's why Pivot uses a personal breath sensor, one-on-one coaching, and a customizable smartphone app — to help you figure out your own motivations, track your progress, and build a quit plan that works for you. With Pivot, you don't have to quit smoking — you get to.

The Pivot App

How Pivot is Different

Quite simply, it's why people describe

of something they have to do.

Pivot as something they get to do, instead

The Pivot Breath Sensor The only FDA-cleared carbon monoxide breath sensor for consumer use. It changes the game.

Coaching Pivot users are paired in-app with a personal coach who stays with them for the duration of the program.

0

Community Participants have access to robust support from fellow Pivot participants.

Nicotine Replacement Clinically proven nicotine replacement

Clinically proven nicotine replacement therapy (gum, lozenges, the patch) delivered right to users' doors.

Engagement

In client settings, Pivot enrolls up to three times more participants than the industry average.
